

Pen Needles

Product Name (Manufacturer)	Description/Use
Aimsco Ultra-Thin II Pen Needles (Delta Hi-Tech)	Two sizes: 29G, 1/2" and 31G, 5/16". 100 per box.
BD Ultra-Fine Mini Pen Needle (BD)	31G, 5 mm (3/16"). Shortest pen needle in the United States. Can be safely used by both children and adults, providing reliable injections with no "pinch up" of skin required. Paper tab and inner shield are color-coded purple for easy size/gauge recognition.
BD Ultra-Fine Original Pen Needle (BD)	29G, 12.7 mm (1/2"). A good choice for people with dexterity problems or those who take larger doses. Wider inner diameter makes it easier to press the push button and expel insulin. Paper tab and inner shield are color-coded pink for easy size/gauge recognition.
BD Ultra-Fine Short Pen Needle (BD)	31G, 8 mm (5/16"). Thinnest pen needle available. Not a good choice for people who struggle to maintain a healthy weight. Paper tab and inner shield are color-coded blue for easy size/gauge recognition.
Clickfine Pen Needles (Can-Am Care)	Clicks on all major diabetes pens for quick and easy needle change. Three sizes for custom fit: 31G, 6 mm (1/4"), 31G, 8 mm (5/16"), and 29G, 12 mm (1/2"). Clickfine is also available under store brands including at Kroger, Kmart (Value-Plus), TopCo (TopCare), and Publix in 100-count boxes, and at Wal-Mart (ReliOn) in 50-count boxes.
NovoFine Disposable Pen Needles (Novo Nordisk)	Three needle sizes: 30G, 8 mm; 31G, 6 mm; and 32G, 6mm. Shorter needle length helps prevent patients from accidentally injecting insulin into muscle tissue. Unlike other needles, NovoFine needles have a larger bore internal opening and thinner walls. This allows the insulin to flow more freely, taking less time overall to deliver the dose.
PiC Insupen Pen Needles (Medical Plastic Devices)	Triple-sharpened tip; antifriction, silicone-treated needles. Reduced external diameter eases penetration and minimizes discomfort. Cartridge tip penetrates lid easily while preventing fragments from entering cartridge. Compatible with most pens. Six sizes: Original 29G, 12 mm; Basic 30G, 8 mm; Effective 31G, 8 mm and 6 mm; Sensitive 32G, 8 mm and 6 mm. Available in packs of 100.
SureComfort Pen Needles (Allison Medical)	Three sizes: 31G, 5 mm for children and thin adults; 31G, 8 mm for adults; and 29G, 12 mm for those needing a longer needle. Color coded on paper tab and needle cover. Silicone coated for injection comfort. All sizes compatible with pens sold in the United States.
UltiCare Pen Needles (UltiMed)	Available in 31G, 6mm; 31G, 8mm; and 29G, 12mm. Available in containers of 100. Includes patented, tamperproof container that provides security and safety. Pen needles are shipped and stored within the container until needed. With one movement, the pen needles are discarded into the top of the UltiGuard container, eliminating accidental needle sticks.
Unifine Pentips - Original (Owen Mumford)	29G, 12mm. Has silicone lubricated coating designed for maximum comfort. Fits most pens. Box of 100 pen needles comes with free pen needle remover.
Unifine Pentips - Short (Owen Mumford)	31G, 8mm. Has silicone lubricated coating designed for maximum comfort. Fits most pens. Box of 100 pen needles comes with free pen needle remover.
Unifine Pentips - Ultra Short (Owen Mumford)	31G, 6mm. Has silicone lubricated coating designed for maximum comfort. Fits most pens. Box of 100 pen needles comes with free pen needle remover.
