Effective January 2008

Circulation/frequency: 15,195/monthly

A member of Audit Bureau of Circulations.

EDITORIAL PROFILE

DIABETES CARE has the highest circulation among journals in the field of endocrinology/metabolism, and it is the most cited journal devoted exclusively to clinical diabetes research.* This monthly professional journal includes reviews and commentaries on pressing issues in diabetes care, as well as original manuscripts on human studies relating to clinical care, education and nutrition, epidemiology and health services, and emerging treatment, and technologies.

READER PROFILE

DIABETES CARE is the #1 journal among leading clinicians treating diabetes — it is the must-read publication for learning about the latest clinical research and clinical practice standards among both physicians and the increasingly influential nurse practitioner community. The clinicians who read DIABETES CARE spend more than half of their time in direct patient care, and they frequently engage in professional education activities. Readers include endocrinologists, epidemiologists, diabetes educators, and other health professionals.
